alpha beta				****	
beca				MORE DETAILS	
nput Format					
The first line contains an integer, $m{N}$ , the number of students.					
The $2N$ subsequent lines describe each student over $2$ lines.				<b>ل</b> Download sample test cases	
The first line contains a student's name.  The second line contains their grade.					
					Constraints
• $2 \le N \le 5$					
Inere will always	be one or more stude	nts having the second lo	west grade.		
Output Format					
Print the name(s) of any student(s) having the second lowest grade in. If there are					
multiple students, o	rder their names alpha	betically and print each	one on a new line.		
Sample Input 0					
5					
Harry					
37.21 Berry					
37.21					
Tina 37.2					

7/5/22, 11:55 1 of 3

```
Sample Output 0

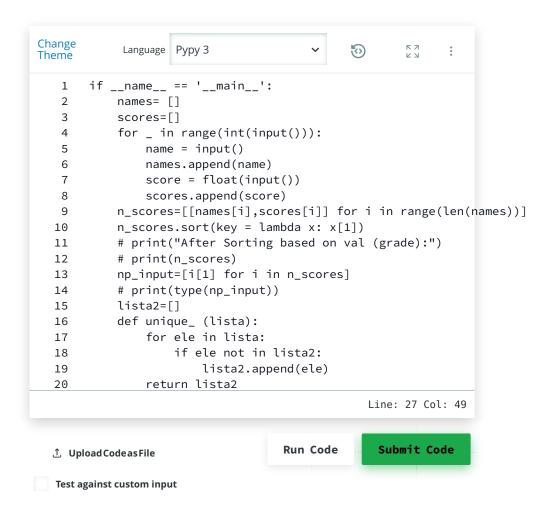

Berry Harry

Explanation 0

There are 5 students in this class whose names and grades are assembled to build the following list:

python students = [['Harry', 37.21], ['Berry', 37.21], ['Tina', 37.2], ['Akriti', 41], ['Harsh', 39]]

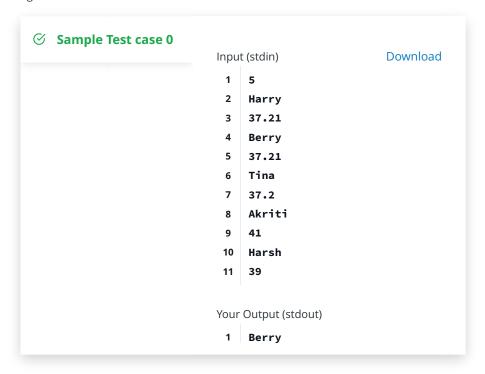

The lowest grade of 37.2 belongs to Tina. The second lowest grade of 37.21 belongs to both Harry and Berry, so we order their names alphabetically and print each name on a new line.
```

## **Congratulations!**
